

MECHANICAL DESIGN DRAFTER

AT A GLANCE

You'll join a team that works on real projects, the kind that make it all the way from the office to the shipyard. This is a permanent, full-time position (40 hrs) with a flexible schedule, group insurance and a retirement plan.

Flexible work base: we set it together based on the role, the projects and your profile. Navanex has more than one service location.

Heads up: occasional on-site presence (shipyard) depending on the project.

To apply: send your résumé to info@navanex.ca (and a portfolio if you have one).

IF YOU COME FROM MECHANICAL DRAFTING, YOU'RE IN THE RIGHT PLACE!

You don't need prior experience in naval architecture to apply. If you have a solid foundation in 3D modelling, drafting, assemblies and clear technical documentation, that's exactly the kind of know-how we're looking for. On the personal side, we want someone reliable, thorough and curious, who can ask the right questions and work well as part of a team. As for the maritime world, we can introduce you to it: if you have the basics and the right attitude, we'll guide you through the rest.

THE NAVANEX VIBE

We're a small, tight-knit team. We work hard, but you're never left on your own in a corner.

Things move fast here: projects advance, priorities fall into place, and we adjust together whenever we need to.

We aim for the good kind of performance: the kind where you feel challenged, well supported, and where you actually see projects move forward.

We help each other out, we keep things simple, and we take pride when the result is solid.

ABOUT NAVANEX

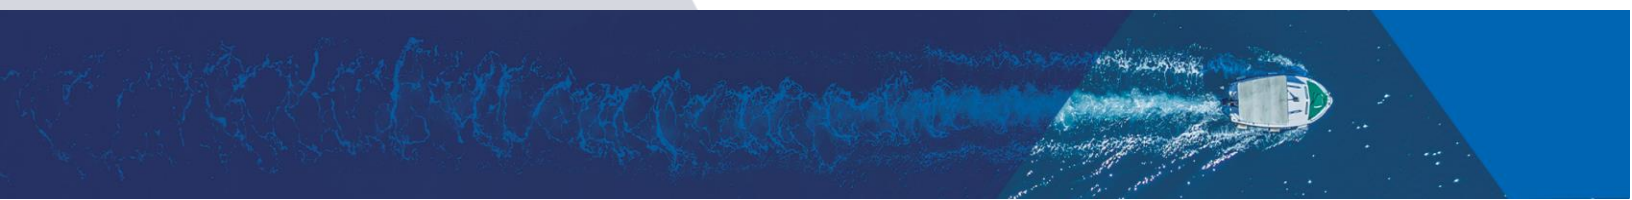

Navanex is a company specialized in naval architecture and marine engineering.

What sets us apart is our understanding of the shipyard and our end-to-end support: we don't "just draw," we follow projects all the way through to completion.

Our mission: to simplify naval architecture, design innovative vessels, and provide seafarers with top-tier engineering services.

YOUR DAY-TO-DAY ROLE

- Build 3D models of innovative vessels and prepare assembly drawings;
- Design all the components that make up a vessel;
- Produce technical drawings and construction documents with exemplary rigour;
- Integrate mechanical systems with creativity and ingenuity.

YOUR PROFILE

- A DEP or DEC in industrial drafting, mechanical engineering or any equivalent training;
- 3 to 5 years of experience in mechanical drafting or technical design;
- Proficiency with drafting software such as AutoCAD, Inventor, Rhino or equivalent;
- The ability to work in a structured, methodical, autonomous and rigorous way;
- French and English at a 4/5 level (spoken and written).

WHAT SETS YOU APART

- Strong priority management and the ability to deliver on time;
- Clear communication and ease in conversation (including with clients when needed);
- A genuine interest in the maritime world and shipbuilding;
- Autonomy, resourcefulness and flexibility;
- Curiosity about new technologies;
- Good judgment, an analytical mind and attention to detail.

WORKING CONDITIONS

- A permanent position, 40 hrs/week;
- A competitive salary based on your profile;
- Access to a group insurance program and a retirement plan;
- A flexible schedule with the option of remote work (part-time).

HOW IT WORKS

1. Send your résumé (portfolio if you have one). Cover letter optional (a few lines in your résumé are enough if you'd like).
2. We hop on a 15–20 min call to connect for the first time, see if we're aligned and give you a chance to ask your questions.
3. Main interview: a hands-on technical discussion about how you work + examples (drawings, models, projects).

Even if your background is unconventional: apply. The first call is there to explore together whether it's a good fit.

READY FOR A NEW CHALLENGE?

Send us your application at info@navanex.ca. You can also give us a call with any questions or for more details.
